

Bus Buzz Wire, 2022

Free Form Sculpture Game

Try your (steady) hand by moving the flexible wire over the bus without making it honk or light.

This is from DiY activity at the Asylum to learn simple electronics circuit and soldering techniques.

Did you know that an old 9V battery can provide a new 9V battery clip for your next project ?

Sculpture built using brass wire, small piece of prototyping PCB, piezo buzzer, LED, a piece of flexible wire and a 9V battery.

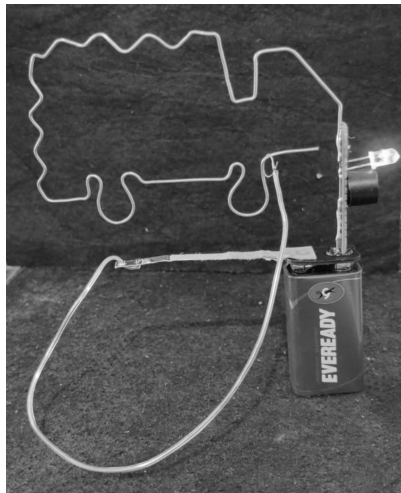

Connecting Rod, 2020

Extracted from a compressor

This fidget spinner comes from a defective, oil free, air compressor inside an Oxygen Concentrator.

Did you know that the Maker'sAsylum designed and built Open Source Hardware Oxygen Concentrators in 2021 ? Ask us.

Made by pressure die casting aluminium, precision machined on a CNC machine, and with some interference fit bearings for smooth motion.
